MASHIKUR RAHMAN MIRASH

Software Engineer

Hello! I'm Mashikur Rahman Mirash. I'm passionate about creating software and websites. My favorite tool is PHP Laravel, which allows me to build powerful and dynamic web applications. As a self-taught coder, I've honed my skills through practice and determination. Solving problems is my forte, and I'm always eager to learn new technologies.

JOB EXPERIENCE

Full-Stack Software Developer

2022 - Present

Alpha.net.bd

At "alpha.net .bd," I have contributed to spearheading the development of in-house software solutions, encompassing essential tools such as employee leave management systems, billing software, and web hosting automation platforms.

Backend Developer

2021 - 2022

Web Solution US

I've had the privilege of working at Web Solution US, a dynamic company in the web development sector. During my tenure there, I contributed to the development of various projects, including CMS and e-commerce solutions, all of which have been featured on platforms like CodeCanyon.

Full-Stack Web Developer

2020 - 2021

Hurtle Bee

Hurtlebee, a startup company founded by my friend, has been an exciting journey where I've been involved in developing pivotal software solutions. Among them are Doctor Appointment Management Software, Hospital Management Software, Prescription Software, and more.

Freelance Web Developer

2018- 2020

BD IT Factory

At BD IT Factory, a leading news portal development company, I've had the privilege of contributing to the creation of numerous news portals using PHP and Laravel. Additionally, I've been involved in the design process, crafting intuitive and visually appealing websites for these platforms.

PROJECT

hmPanel - Web Hosting Control Panel

hmPanel is a tool that helps you manage your websites on Linux servers. It's like a control center where you can add websites, handle FTP services, and customize PHP versions.

OutdoorBD - Doctor Appointment

OutdoorBD is an online platform designed to facilitate doctor appointments for patients through video calls. Developed with PHP, Laravel
